

New in 2010! Home School Field Trip THURSDAYS!

The first Thursday of every month is dedicated to Atlanta's home school families. There is no group minimum, just register and come to Piedmont Park Conservancy Community Center to explore the Park and learn about life science. From understanding habitats and ecosystems to identifying species and learning about food chains, the lessons are comprehensive and engaging. We will provide programming for multiple age and family groups simultaneously and provide a monthly theme. For more information about participating in Home School Field Trip Thursdays, contact the Education Programs Manager, Mary Moerlins at 404-876-4024 ext. 326 or email at mmoerlins@piedmontpark.org.

Each class is priced at the same rate as traditional field trips, \$5 per participating child.

There is no charge for adult chaperones. Siblings of participants under 4, and nonparticipating siblings are welcome to attend with their adult at no charge as well.

Upcoming Topics Include:

February 4, 2010- Winter Birds- *identifying birds, where they live, what they eat and what we can learn from them*

March 4, 2010- Seed, Sprout, Grow! *All about Plants and Photosynthesis*

April 1, 2010- Learning Life Cycles
